SUMMARY

The Layman's Report aims at presenting the scope, the detailed objectives, the actions and the results of the project in a way that the average reader (without a scientific background) will be able to understand. Towards this end, the 1st version of the Layman's report was designed and distributed to the stakeholders of the project. The 1st version was developed in English only. Their feedback and comments were taken into account for the final version of the Layman's Report.

1st version of Layman's Report

To develop the Layman's Report, a first draft was designed and distributed to the beneficiaries' of the project. The first draft of the layman's report consisted of the following sections:

1. The problem
2. The challenge
3. Methodology
4. Innovation
5. Results
6. Benefits
7. Publicity
8. Networking
9. Contact

All sections were written in simple language, aiming at informing the readers, who are not familiar with the scientific terminology of the subject, about the project objectives, methodology and its main results. The 1st draft of the Layman's report was distributed also to key stakeholders in order to have a broad review about the context.

The feedback from the beneficiaries and the Stakeholders was taken into account to produce the final version of the Layman's report.

The 1st version was developed in English only and after the finalization we translated it in Greek and Italian.

The 1st version of the Layman's report is submitted in electronic form in the Appendix of the Deliverable. The Appendix includes the initial text in a text, and the 1st draft version as a pdf after the integration of the text with the graphic design.
