SUMMARY

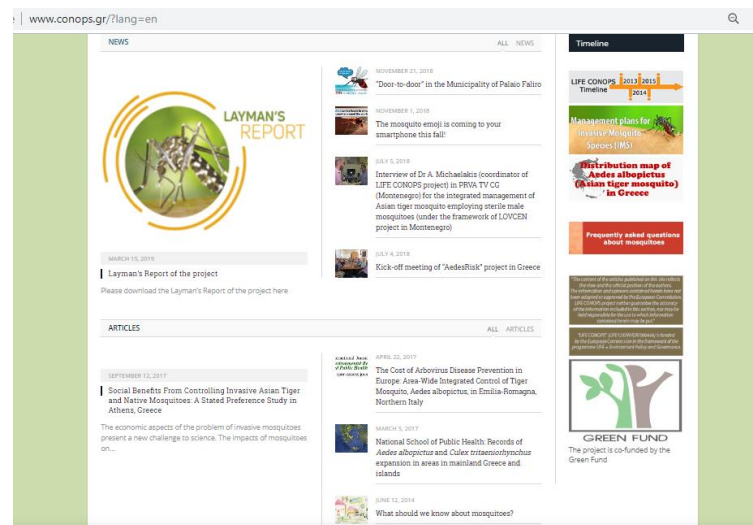

After the creation of the 1st version of the Layman's report and following the distribution to the beneficiaries and selected stakeholders of the project, LIFE CONOPS team proceeded with assessing and incorporating the comments to the final version. The final version was afterwards translated in Italian and Greek and sent for print. It was also uploaded to the website of the project.

Final version of Layman's Report

Following the assessment of the comments received from both the beneficiaries and the stakeholders, LIFE CONOPS team produced the final version of the Layman's report.

The main changes in the final version of the Layman's report were the following:

1. We included a map with the point of MDs installation in Greece and Italy.
2. A paragraph was added in the results, concerning the development and evaluation of biodegradable substances as potential larvicidal and repellent agents.
3. The dissemination section was slightly restructured, in order to clearly present the extensive work done throughout the project.
4. The paragraph of the "Networking" was enriched so as to contain all major stakeholders of the project.
5. The photographs were changed and new ones were added so as to have a clear connection with the implementation of the project.

After the finalization of the report, it was translated in Greek and Italian and uploaded in LIFE CONOPS website.

The final version of the Layman's report in English, Greek and Italian is presented in the Appendix D.5.2.
